

# FITTING INSTRUCTIONS

## XK120 Getrag gearbox conversion kit

Partnumber: 020.218

The kit comes complete with a :

- propshaft
- speedo cable
- adaptor piece
- completely rebuilt 5 speed gearbox.

This XK120 Getrag conversion kit **MUST** be fitted by an experienced workshop as it can require welding or modification to the chassis or mounts.

The conversion plate allows direct fitting onto the manual XK120 bellhousing.

The chassis has to be modified for the rear mounting, but this is not so complicated.

It may be possible that you have to modify the length of the propshaft especially for early XK120 cars.
